

Chinese New Year- I am learning how to use dominoes for math investigations. Key Stage 3

During Chinese New Year, children stay up late playing games, including playing with dominoes.

Can you solve this domino puzzle? If you don't have any dominoes at home, you can use these virtual ones.

Using a full set of 28 dominoes it is possible to make 7 small squares, four dominoes in each.

What you have to do:
Make the squares so that where dominoes touch, the numbers of spots on each side must be the same, like this example:
